

The Invisible Force Improving the Way We Work and Live

Ambient invisible intelligence is achieved by embedding small smart tags and sensors in various products. These sensors enable tracking and sensing capabilities to be delivered at scale and at an affordable cost. They also empower products and devices to sense users' needs and intentions and deliver personalized services.

Solutions

Avnet AVT9152 Module

The Avnet AVT9152 Module combines BLE, LTE and GPS technologies into a module targeting a broad range of IoT applications where low power and small size matters. Market ready, the module supports both LTE-M and NB-IOT technology and is certified to conform with FCC, CE, RCM and BQB. [Learn more](#)

Ambient Invisible Intelligence - Bluetooth 6.0

Avnet together with the leading suppliers bring you the best ambient invisible intelligence - Bluetooth 6.0 products.

Abracon
ABM14N ultra miniature MHz quartz crystal

Amphenol
Fitmate 0.8mm wire-to-board connector system

Belfuse
Chip fuse

Bourns
RF components AC4842 series

Murata
Type 1SC LBAD0XX1SC

Nordic
Ultra low power SoC

Novosense
NSHT30

Panasonic
High performance chip resistors

Power Integrations
650 V Qspeed silicon diodes

Rohm
Ambient light sensor IC (under development)

Samtec
Micro blade & Beam strips

Toshiba
Solution proposal for smart watch

Transcend
Bluetooth 6.0 meets MTE712P SSD

Vishay
235 EDLC-HVR ENYCAP™
