

DISTRIBUTED ANTENNA SYSTEMS (DAS)

Antennas designed to provide pattern coverage that is optimized for indoor and/or outdoor coverage requirements for the Cellular/LTE, WiFi/WLAN and LMR frequency bands.

Smart Technology. Delivered.™

About Laird

Laird is a global technology business focused on enabling wireless communication and smart systems, and providing components and systems that protect electronics. Laird operates through two divisions, Wireless Systems and Performance Materials. Wireless Systems solutions include antenna systems, embedded wireless modules, telematics products and wireless automation and control solutions. Performance Materials solutions include electromagnetic interference shielding, thermal management and signal integrity products. As a leader in the design, supply and support of innovative technology, our products allow people, organizations, machines and applications to connect effectively, helping to build a world where smart technology transforms the way of life. Custom products are supplied to major sectors of the electronics industry including the handset, telecommunications, IT, automotive, public safety, consumer, medical, rail, mining and industrial markets.

Laird provides systems, components and solutions that protect electronics from electromagnetic interference and heat, and that enable connectivity in mission critical systems through wireless applications and antenna systems.

We are a leader in the design, development and delivery of innovative technologies that enable people, organizations and applications to connect efficiently and effectively. With a proud history stretching back to 1824, Laird has been at the forefront of technological innovation for almost two centuries. And we continue to deliver.

Our reputation has been built on three guiding principles:

- Innovation putting our in-depth knowledge of the latest materials and processes to work in creating outstanding products for our customers.
- Reliable fulfillment delivering what our customers need to their exact specifications, on time and on budget, and in the quantities required.
- Speed rationalizing the design and delivery cycle to minimize the time from initial concept to final implementation.

CFD69383P/ CFD69383P1 BEST SELLER!

The CFD69383P/CFD69383P1 are Low PIM, 2-Port MIMO indoor wideband omnidirectional low profile ceiling mount antennas. They are designed to provide pattern coverage that is optimized for indoor coverage requirements at 698-960 MHz, and 1690-4000 MHz for the LTE, AWS-3, WCS and CBRS/ WiMAX frequency bands. The CFD69383P/CFD69383P1 are applicable for environments where aesthetics and wide angle coverage are necessary for successful wireless deployment.

CMD69273P

BEST SELLER!

The CMD69273P (Patent Pending Technology) is an indoor broadband low PIM 2-port MIMO omnidirectional ceiling mount antenna. It is designed to provide pattern coverage optimized for indoor requirements at 698-960MHz and 1710-2700MHz frequency bands. The individual antenna elements are designed with linear H/V-polarization components oriented to radiate a pattern specifically shaped to deliver optimal ceiling mount performance .

PAS69278P

BEST SELLER!

The PAS69278P antenna operates withi 698-960 / 1710-2700 MHz and is a wide band dual port Low PIM panel antenna with slant 45 polarization. The PAS69278P covers the domestic LTE700 / Cellular / PCS / AWS /MDS and global GSM900 / GSM1800 / UMTS / LTE2600 bands. The antenna is ideal for both indoor and outdoor applications. It includes a UV stable radome enclosure that provides years of use without degradation to either the mechanical properties or aesthetics.

VIEW DATA

BEST SELLER!

The CFSA69383P is a Low PIM indoor wideband omnidirectional low profile ceiling mount antenna. It is designed to provide pattern coverage that is optimized for indoor coverage requirements at 698-960 MHz, and 1690-3800 MHz for the GSM, DCS, UMTS, AWS-3 and LTE/WiMAX frequency bands. The CFSA69383P is applicable for environments where aesthetics and wide angle coverage are necessary for successful wireless deployment. The surprisingly small size and extreme low profile enables maximum mounting flexibility while maintaining desired in-building aesthetics.

PAV69278PI

BEST SELLER!

The PAV69278P1 operates within 698-960 / 1710-2700 MHz and is a multi band, low PIM, high gain directional panel antenna with vertical polarization. This antenna is capable of operating in the LTE700/Cellular/PCS/AWS/MDS and global GSM900/GSM1800 /UMTS /LTE2600 bands. The radiation patterns are uniform and symmetrical, providing high level signal density into defined coverage zones. This antenna will greatly enhance the performance of LTE systems and is ideal for indoor applications. The antenna includes a wall mounting bracket, anchors and bolts.

CFS69383P

The CFS69383P is a Low PIM indoor wideband omnidirectional low profile ceiling mount antenna. It is designed to provide pattern coverage that is optimized for indoor coverage requirements at 698-960 MHz, and 1690-3800 MHz for the GSM, DCS, UMTS, AWS-3 and LTE/WiMAX frequency bands. The CFS69383P is applicable for environments where aesthetics and wide angle coverage are necessary for successful wireless deployment. For more details visit www.lairdtech.com/products/CFS69383P

CFSA60383P

The CFS60383P is a Low PIM indoor wideband omnidirectional low profile ceiling mount antenna. It is designed to provide pattern coverage that is optimized for indoor coverage requirements at 600-960 MHz, and 1690-3800 MHz for the GSM, DCS, UMTS, AWS-3, WCS and LTE/WiMAX frequency bands. The CFS60383P is applicable for environments where aesthetics and wide angle coverage are necessary for successful wireless deployment.

CLS69273

The CLS69273 is an indoor 698-960 MHz / 1695-2700 MHz wideband omnidirectional low profile ceiling mount antenna designed to provide pattern coverage that is optimized for indoor coverage. Ideal for applications requiring GSM, DCS, UMTS, and LTE/WiMAX frequency band operation. The antenna features a pattern that has been specifically shaped to provide optimal performance from a ceiling mount location. The pattern is also very uniform and symmetrical, providing system integrators with the ability to precisely determine cell size.

CMS69273/CMS69273S

The CMS69273/CMS69273S is an indoor wideband omnidirectional ceiling mount antenna. It is designed to provide pattern coverage that is optimized for indoor coverage requirements at 698-960 MHz, 1575 MHz, and 1710-2700 MHz for the GSM, DCS, UMTS, and LTE/WiMAX frequency bands. The antenna features a pattern that has been specifically shaped to provide optimal performance from a ceiling mount location. The pattern is also very uniform and symmetrical, providing system integrators with the ability to precisely determine cell size.

CMQ69273P

The CMQ69273P operates within 698-960 / 1710-2700 MHz and is an indoor broadband Low PIM 4 port MIMO omnidirectional ceiling mount antenna. It is designed to provide pattern coverage that is optimized for indoor requirements. The individual antennas elements are designed to radiate a pattern that has been specifically shaped to provide optimal radiation within a coverage zone.

PAV692781

The PAV69278I operates within 698-960 / 1710-2700 MHz and is a multiband, high gain directional panel antenna with vertical polarization. Capable of LTE700/Cellular/PCS/AWS/ MDS and global GSM900/ GSM1800 /UMTS/LTE2600 band operation. The radiation patterns are uniform and symmetrical, providing high level signal density into defined coverage zones. This antenna will greatly enhance the performance of LTE systems and is ideal for indoor applications. The antenna includes a wall mounting bracket, anchors and bolts.

PAV69278PO

The PAV69278PO operates within 698-960 / 1710-2700 MHz and is a Low PIM, multiband, high gain directional panel antenna with vertical polarization. This antenna is capable of LTE700/Cellular/PCS/AWS/MDS and global GSM900/GSM1800/UMTS/LTE2600 band operation. The radiation patterns are uniform and symmetrical, providing high level signal density into defined coverage zones. This antenna will greatly enhance the performance of LTE systems and is ideal for indoor or outdoor applications.

SL8025WP

The SL8025WP operates within 806-2570 MHz is a tri-band linearly polarized 3 dBi omnidirectional panel antenna. It is designed to provide pattern coverage that is optimized for indoor coverage requirements at 806-960 1710-2170 and 2400-2500 MHz for the GSM DCS and UMTS frequency bands. The antenna features a pattern that has been specifically shaped to provide optimal performance from a ceiling mount location.

WHAT SETS US APART

MISSION

A trusted partner delivering technology to the world through innovation, speed, & reliable fulfillment.

VISION

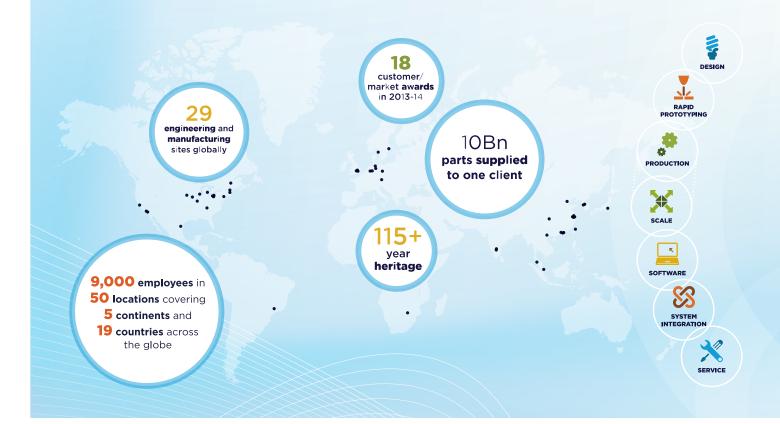

A world where smart technology enables virtually everything to sense, think and communicate; transforming our way of life and empowering us to do more than we can imagine

Working as a global team of talented individuals to make a difference for our employees, business partners and our world

We have an unwavering commitment to being honest and ethical in all situations and treating each other with dignity and respect.

We create an open and engaging environment that thrives on high energy, adaptability and delivering on our commitments.

Laird is a place with great opportunities for personal and professional growth for those who work hard, are willing to learn and deliver results.

Smart Technology. Delivered.™
