

## **Information regarding Regulation (EC) 1907/2006 (REACH)**

Concerning the Registration, Evaluation, Authorization and Restriction of Chemicals

Regulation (EC) no 1907/2006 (REACH) sets different requirements for the actors in the supply chain.

2J Antennas is a manufacturer of product and does not produce chemical substances or mixtures. Thus, 2J Antennas is a so called "downstream user" in the sense of the Regulation (Art.3, 13). 2J Antennas doesn't have possibility to register substances. This was done by our supplies.

For articles that contain a SVHC above 0.1% w/w the duty to communicate information according to article 33 applies. Every supplier of such an article must provide the recipient at least with the name of the substance, as long as no other information necessary for safe use are available to the supplier. Supply chain of

We therefore insist that the suppliers pre-register under REACH all substances manufactured or imported in the EU. The suppliers are equally responsible to manage their supply chain accordingly and ensure that their own suppliers act/ register according to REACH as well.

On 27th June 2018 lead (CAS 7439-92-1) was added to the REACH candidate list. This SVHC is contained above 0.1% w/w in all 2J Antennas products which contains connectors which are machine machining (turning – milling) for which RoHS exemption 6c is applied.

*2J Antennas will therefore only:*

- purchase substances preparations and articles that are registered under REACH
- purchase materials and articles free from " Substances of Very High Concern" (SVHC)

To the actual knowledge and based on information from the suppliers no articles (including all packaging materials) of 2J Antennas contains substances listed in REACH Annex XIV and Annex XVII above the threshold defined in these annexes.
