DIGI

RETAIL SOLUTIONS

The always-on buzz of retail systems means that any technical glitch can cause lost revenue, lost inventory, and maybe lost customers.

Digi IoT connectivity helps ensure that the flood of transaction data keeps flowing with reliability and tight security—whether it's from an ATM, remote lottery terminal, beverage sale aboard a jet, or a financial card swipe for a birthday gift.

MAINTAIN UPTIME
Multipath network resilience and high-speed LTE performance make your systems and services constantly available, so you never disappoint a customer.

ENSURE SECURITY
Since most retail transactions are purchases, Digi M2M devices provide high levels of data security and encryption—including PCI compliance.

CREATE EXPERIENCES
Remotely delivering and managing content for digital signage and kiosks can create more customer engagement while reducing maintenance costs.

EXPAND GLOBALLY
Digi M2M connectivity is certified throughout the world, making it easier for you to deploy and remotely manage retail systems wherever your business grows.

DIGI

BRANCH OFFICE NETWORKING

Wireless cellular primary or backup solutions from Digi give your business communications network an immediate, cost-effective, alternate connection in the event that your primary landline network connection is lost. These solutions can help you:

PROTECT YOUR BUSINESS FROM COSTLY INTERRUPTIONS
Continue serving customers and generating revenue, even during a primary access outage.

REPLACE EXPENSIVE LAND LINES
Built in cellular redundancy with dual SIMs ensure multipath network resilience.
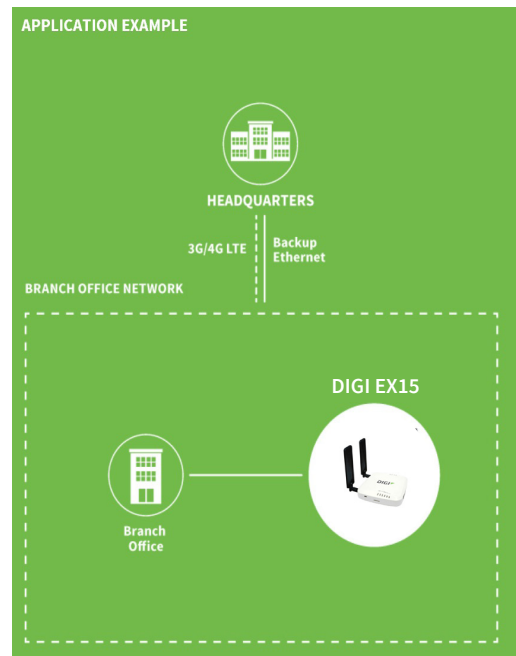

EASILY EXTEND COVERAGE TO NEW LOCATIONS
Comprehensive tools for easy router installation and Management.

MAINTAIN PCI COMPLIANCE
Utilize comprehensive tools to maintain PCI-DSS 3.0 security compliance.

BUSINESS CONTINUITY
Disruptions are costly. When wired connections fail or are unavailable, you need a reliable and cost-effective alternative. Digi ensures your business and remote offices always have a secure, high-speed wireless connection, to keep your business operating without interruption.

APPLICATION EXAMPLE

HEADQUARTERS

3G/4G LTE | Backup Ethernet

BRANCH OFFICE NETWORK

DIGI EX15

Branch Office

KEEP YOUR BUSINESS UP AND RUNNING WITH RESILIENT HIGH SPEED 3G/4G LTE

Digi EX15 Router
Branch connectivity in a compact, affordable all-in-one solution

Digi WR21 Router
High speed LTE Advanced and Wi-Fi router

Digi Remote Manager®
Comprehensive IoT Device Management Application for Secure Asset Monitoring and Control
30-Day Free Trial: https://myaccount.digi.com/

DIGI

DIGITAL SIGNAGE AND KIOSK

Digi offers the ideal alternative for kiosk operators: a complete, integrated solution for setting up a reliable, affordable Internet connection instantly. You'll get the connectivity you need to accept credit cards in an unattended environment, and to do M2M transmissions to and from data centers that maintain inventory and other critical operating information.

INCREASE ENGAGEMENT AND TARGET MESSAGES
Update signage and content in real-time across dispersed locations.

MAINTAIN PCI COMPLIANCE
Utilize comprehensive tools to maintain PCI-DSS 3.0 security compliance.
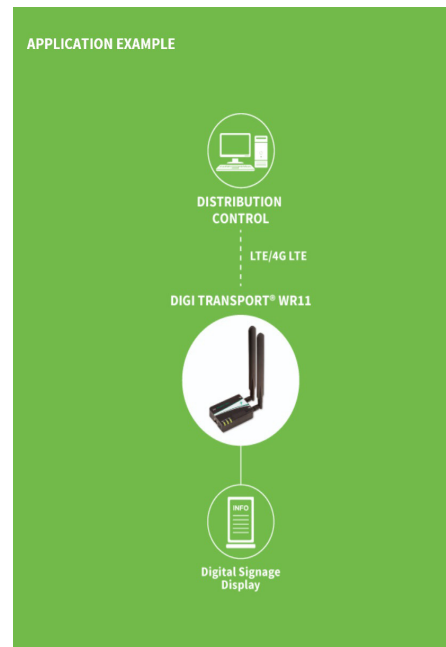

LOWER INSTALLATION COSTS
Eliminate unnecessary wiring and trenching costs and lower installation times dramatically.

MAINTAIN 100% UPTIME
Reduce the risk of failures by employing the industry's most reliable connectivity solutions.

MANAGE DEVICES REMOTELY
Easily monitor, manage and limit on-site support with comprehensive device management and services.

APPLICATION EXAMPLE

DISTRIBUTION CONTROL

LTE/4G LTE

DIGI TRANSPORT® WR11

Digital Signage Display

SECURE, RELIABLE 3G/4G/LTE AND LONG RANGE RF CONNECTIONS TO INDOOR AND OUTDOOR INTERACTIVE DISPLAYS AND SELF-SERVICE TERMINALS
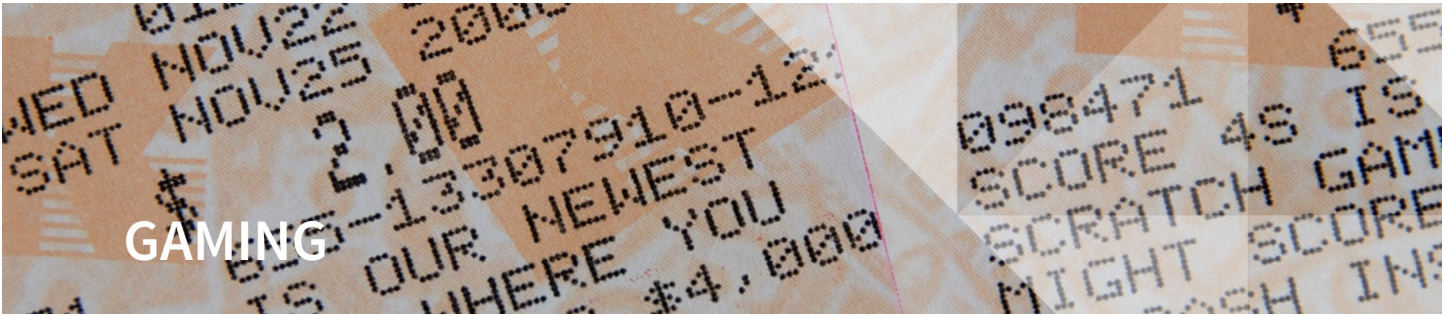

Digi® 6530-SR Router
Versatile high-performance LTE router for critical networking applications with a dedicated serial port and optional Wi-Fi

Digi® LR54 Routers
High speed LTE Advanced and Wi-Fi router.

Digi® WR11 Routers
3G/4G/LTE enterprise class cellular routers

For more Retail Solutions, visit www.digi.com.

GAMING

Digi's cellular routers connect to most all major domestic and international carriers. Our carrier connections are private, dedicated, and segregated from all other traffic, and are redundant and configured for automatic failover. Digi enables use of multiple carriers to provide maximum coverage and redundancy.

MULTI PATH NETWORK RESILIENCE
Built in redundancy with dual SIMs.

HIGHSPEED LTE PERFORMANCE
For fast and efficient transactions.

REMOTE MANAGEMENT
(Provisioning and Monitoring) Secure centralized access to router for call history, status, viewing if terminal is connected to the router.

HIGH RELIABILITY AT A LOWER COST
Digi can deliver WAN connectivity in a fraction of the time required to install a traditional wire-line connection.

APPLICATION EXAMPLE

APPLICATION SERVER

4G LTE

DIGI TRANSPORT® WR11

Gaming Terminal

MANAGING REMOTE LOTTERY AND GAMING TERMINALS WHILE PROVIDING A SEAMLESS AND SECURE 3G/4G LTE CONNECTION TO THE LOTTERY CENTRALIZED DATA PROCESSING CENTER

Digi® 6310-DX
Avoid network outages with primary or backup LTE connectivity; integrate seamlessly with existing infrastructure

Digi® WR11
3G/4G/LTE enterprise class cellular routers.

Digi® WR44-RR
3G/4G/LTE enterprise class cellular routers.

Digi Remote Manager®
Comprehensive IoT Device Management Application for Secure Asset Monitoring and Control

DIGI

SECURE ATM

Secure data transfer is a requirement for mission-critical applications where highly sensitive information is transmitted, such as ATMs. The Digi TransPort family of upgradeable cellular routers transmit securely through an integrated stateful firewall and VPN tunnels supporting the Internet Protocol Security (IPsec) protocol with AES or Triple DES (3DES) encryption. With robust deployments tools the Digi Transport and Digi Remote Manager make remote ATM installation easier and safer than ever before.

RELIABLE AND SECURE
Deliver the highest levels of security, reliability and availability.

MAINTAIN PCI COMPLIANCE
Utilize comprehensive tools to maintain PCI-DSS 3.0 security compliance.
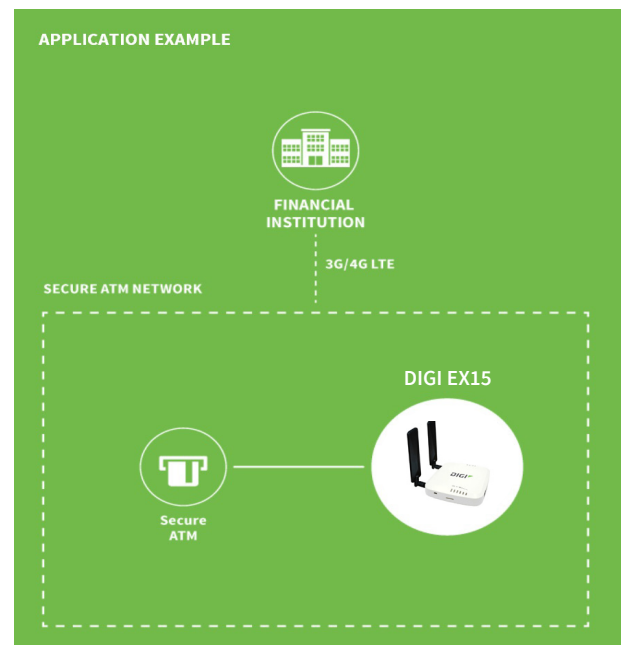

REDUCE INSTALLATION COSTS
Eliminate unnecessary wiring and trenching costs and lower installation times dramatically.

MAINTAIN 100% UPTIME
Reduce the risk of failures by employing the industry's most reliable connectivity solutions.

MANAGE DEVICE REMOTELY
Easily monitor, manage and limit on-site support with comprehensive device management and services.

APPLICATION EXAMPLE

FINANCIAL INSTITUTION

3G/4G LTE

SECURE ATM NETWORK

DIGI EX15

Secure ATM

SECURE 3G/4G LTE ROUTERS FOR REMOTE ATM CONNECTIVITY AND COMPREHENSIVE NETWORK MANAGEMENT TOOLS TO MAINTAIN NETWORK UP TIME.
