

# Connecting the Healthcare Industry

Digi Connect WS and ES provide reliable, secure, and safety-compliant connectivity for healthcare facilities.

## Overview

Emergency rooms and healthcare facilities worldwide battle with how best to track vital patient data flowing from connected medical devices. Digi's efficient device-neutral connectivity offers a path for many different device types to be connected to EHR systems.

## Challenges

- Ability to interface with a wide range of equipment and monitoring software
- The need for secure wireless connectivity
- Must be 60601-1 safety certified for deployment within patient proximity

## Solution

Digi Connect<sup>®</sup> ES and WS provide safe, 60601-1 certified serial-to-network connectivity of passive equipment monitoring and data collection in a medical electrical (ME) system.

- **Digi Connect ES** provides the extended electrical safety of galvanic isolation, Digi RealPort<sup>®</sup> support and an Ethernet switch option for connecting multiple network devices in close proximity.
- **Digi Connect WS** provides an affordable wireless option, power-over-Ethernet support, and a smaller form factor with VESA mounting capability.
