The Industrial marketplace

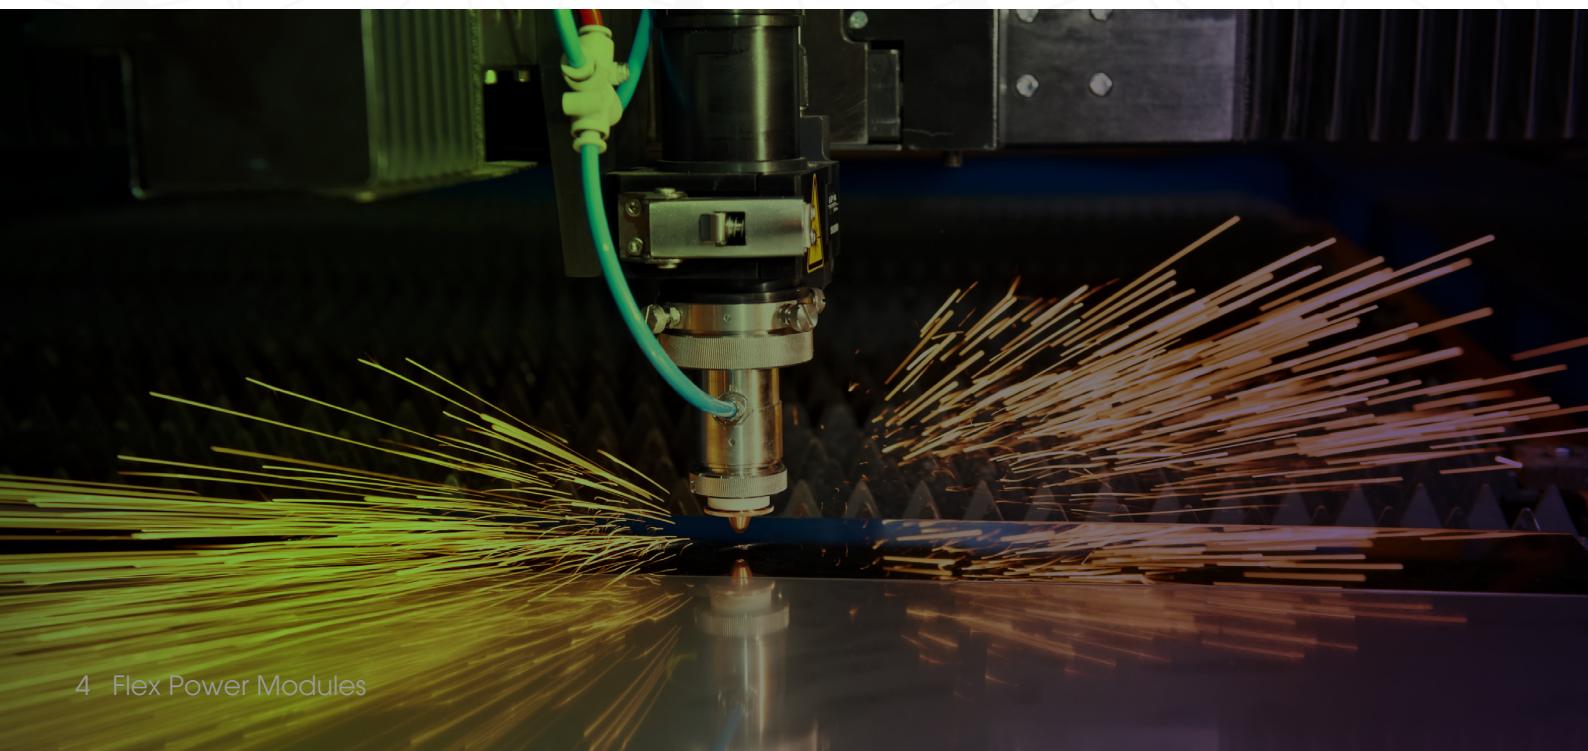

The Industrial market sector covers an extremely varied range of customers and applications including Process Control Equipment, Factory Automation Equipment, Robotics, Test & Measurement Equipment, Automatic Test Equipment, Alternative Energy & Smart Grids to name a few.

What is common throughout all these applications is the need for high reliability, high performance and rugged DC/DC solutions, often running from 24V and/or 12V supply voltages, rather than the 48V more widely found in ICT applications.

Flex Power Modules is committed to grow its product offering in this area, expanding on our total portfolio for the Industrial marketplace.
