Molex antennas for the Smart Home

Intelligent and integrated smart home systems are bringing next generation connected devices into multiple consumer markets. Avnet Abacus offers an extensive portfolio of high performance Molex antennas for use across a broad spectrum of wireless applications in the Smart Home, as well as for industrial, medical and automotive markets. Molex incorporates the latest innovative technology into its antenna portfolio which includes Bluetooth/Wi-Fi, GNSS, Combo, Cellular and NFC.

Designed for fast and easy integration into wireless devices at minimal implementation cost, side and centre-fed cable flexible antenna enable high-performance RF transmission for the most demanding Wi-Fi applications.

Molex provides extensive experience in antenna technologies from concept to completion. Ready-To-Use RF antennas are compact, high performing and available in multiple form factors for all common antenna protocols and frequencies used in IoT, automotive, industrial and medical applications.
